List of Provisionally Accepted Abstracts
(As of 11 February 2021)
## Contents

Session 1: Network Components......................................................................................................................... 2  
Session 2: Power Quality and Electromagnetic Compatibility............................................................. 36  
Session 3: Operation, Control and Protection............................................................................................... 63  
Session 4: Distributed Energy Resources and Efficient Utilisation of Electricity........................... 99  
Session 5: Planning of Power Distribution Systems.................................................................................. 140  
Session 6: DSO Customers, Regulation and Business Models................................................................. 180
Session 1: Network Components
38 Integrating different predictive determinations for the condition assessment of a HV instrument transformer fleet

José Luis Martínez
Edenor, Argentina

42 Study of manoeuvre time of distributed MV disconnectors

William Eriksson¹, Anna Lilly Brodersson², Jesper Rydén³, Jonas Persson³, Ying He⁴
¹Uppsala University, Sweden. ²Vattenfall Distribution, Sweden. ³SLU, Sweden. ⁴Vattenfall R&D, Sweden

43 Optimization of earthing transformer sizing in medium voltage networks

Paolo Marini
Tecnimont, Italy

57 HV fuses with improved cyclic stability ICS

Dirk Wilhelm, Dr. Jens Weber, Johannes-Georg Gödeke
SIBA GmbH, Germany

62 Solid insulation distribution transformer

Kacey Lee¹, Byungchul Moon², Kihak Yi³
¹DuPont Korea, Korea, Republic of. ²Cheryong Electric, Korea, Republic of. ³Cherong Electric, Korea, Republic of
Substation autonomy levels
Radek Javora, Tomas Kozel, Martin Stefanka
ABB s.r.o., Czech Republic

Compact green MV GIS with atmospheric air: Innovation built on decades of heritage
Martin Binnendijk, Gerard Schoonenberg, Frits Besseling
Eaton, Netherlands

Internal arc root movement and burn-through prediction by simulation using first principle
Shailendra Singh¹, Dukkaiappan Subbiah Thevar², Ole Granhaug³
¹ABB Electrification, Norway. ²ABB AG, Germany

Machine learning based evaluation of dynamic events in medium voltage grid components
Erik Winkelmann¹, Christoph Steiner², Iaroslav Shevchenko³, Uwe Kaltenborn², Thomas Steiner³
¹TU Dresden, Institute for Acoustics and Speech Communication, Germany. ²HIGHVOLT Prüftechnik Dresden GmbH, Germany. ³BTU Cottbus, Chair of Energy Distribution and High Voltage Engineering, Germany

Testing of off-shore array cables according IEC 63026 under critical weather conditions
Uwe Kaltenborn, Olaf Schacht, Peter Coors, Katja Vogt, Sacha Markalous
HIGHVOLT Prüftechnik Dresden GmbH, Germany
Self-healing dielectric fluids for fluid filled cables

Rhys Rhodes, Ian German, Maggie Svensson, Henryk Herman, Gary Stevens
Kinectrics UK Limited, United Kingdom

Simple analytical method for magnetic flux density in amorphous and silicon steel
hybrid-core for three-phase 30 MVA higher-efficiency distribution transformer

Chie Kobayashi¹, Naoyuki Kurita¹, Mizuki Ogii, Akira Nishimizu¹, Akira Yamagishi¹,
Shinya Ohara¹, Kuwabara Masanao²
¹Hitachi, Ltd., Japan. ²Hitachi Industrial Equipment Systems Co. Ltd., Japan

Upgrading internal arc resistance of existing substations

Maarten Berende¹, Hannes Van Lijsbeth², Corné Van Loon¹, Marco Grooten¹
¹Enexis Netbeheer, Netherlands. ²Engie Laborelec, Belgium

Designing safe and reliable electrical asset management programs

Martin Robinson
IRISS Group, USA. EPRA, USA

MVDC solid state breaker/limiter control with adaptive hysteresis limits

Alessio Clerici, Riccardo Chiumeo, Chiara Gandolfi
RSE spa, Italy
145
Arc drive due to the eddy current in iron arc extinction grid and interrupting performance

Tomohiro Nishina¹, Kotaro Kurashima¹, Tadashi Koshizuka¹, Kunihiko Hidaka¹, Toyoki Nagasaki², Naoya Yamaguchi²
¹Tokyo Denki University, Japan. ²Togami Electric Mfg.Co.Ltd., Japan

146
Accelerated ageing test of MV/LV distribution transformers: Results and discussion

Jean-Michel Couyade¹, Mehdil Kanoun¹, Jean-Pierre Gontier²
¹EDF Recherche & Développement, France. ²Enedis - Direction Technique, France

155
Artificial intelligence-based optimization for battery energy storage for e-mobility unpredictable loads

Kacper Sowa¹, Piotr Oramus¹, Tomasz Kuczek¹, Hemangi Borole², Carlos Nieto²
¹ABB, Poland. ²ABB, Estonia

165
Extreme weather conditions effects on MV underground cable joints failures

Alessandro Bosio¹, Alberto Berizzi¹, Andrea Morotti², Bartolomeo Greco², Gaetano Iannarelli²,³
¹Politecnico di Milano, Italy. ²UNARETI S.p.A, Italy. ³Università La Sapienza, Italy

183
A new sustainable, readily biodegradable and high performance insulating liquid for power transformers

Carl Wolmarans¹, Bruce Pahlavanpour²,³
¹NYNAS, Sweden. ²NYNAS, United Kingdom. ³IEC TC 10, United Kingdom
189
Enedis requirements for use of vacuum technology for circuit breakers in MV switchgears for primary substations
Franck Gaillard¹, Michel Cordonnier²
¹EDF R&D, France. ²Enedis, France

208
Future medium voltage switchgear: Compressed air or alternative insulation gas?
Maik Hyrenbach¹, Magne Saxegaard², Luciano Chenet³
¹ABB AG, Germany. ²ABB AS, Norway. ³ABB SpA, Italy

209
An approach towards real-time cable ratings for underground medium voltage cables
Sander Rieken¹, Tim Weelinck¹, Daan van der Gun¹, Tongyou Gu¹
¹Alliander, Netherlands. ²Navarra, Netherlands

214
Feasibility of using bird-friendly catch guards for detecting low-hanging conductors on MV lines
Andreas Beutel¹, Bruce McLaren¹, Bernardine Perumal¹, Hendri Geldenhuys¹, John Van Coller²
¹Eskom Holdings SOC Ltd, South Africa. ²University of the Witwatersrand, South Africa
223
Transformers improvement and environment conservation by using synthetic esters in Egypt
Ali Radwan
Middle Egypt Electricity Distribution Company, Egypt

235
Proximity effect in high current conductors – a case study
Kristian Thinn Solheim¹, Henrik Sundholm², Terje Rønningen³, Jens Kristian Lervik¹
¹SINTEF Energy Research, Norway. ²Siemens AB, Sweden. ³Siemens AS, Norway

246
Impact of “wrong” MV cables accessories assembly on its performances : an experimental study
Fabrice Zorzì¹, Mehdi Kanoun¹, Elie Durcik¹, Houssam Tanzeghti², Christophe Lin²
¹EDF R&D, France. ²Enedis, France

249
AI procedure to detect disordered phase connections automatically in electric meters
Abdelrahman Akila
South Delta Electricity Distribution Company, Egypt

250
Impact of energy intermittence on cables and their accessories reliability
Mehdi Kanoun¹, Dominique Meurice¹, Elie Durcik¹, Houssam Tanzeghti², Christophe Lin²
¹EDF R&D, France. ²Enedis, France
Overloadable distribution transformers for flexible loading in future distribution networks

Radoslaw Szewczyk\textsuperscript{1}, Gokhan Kalkan\textsuperscript{2}

\textsuperscript{1}DuPont, Poland. \textsuperscript{2}CG Power Systems Ireland, Ireland

Optimization of transformers for solar or battery storage installations based on a cyclic loading pattern

Radoslaw Szewczyk\textsuperscript{1}, Gokhan Kalkan\textsuperscript{2}

\textsuperscript{1}DuPont, Poland. \textsuperscript{2}CG Power Systems Ireland, Ireland

Comparison of synthetic and natural esters with focus on thermal aspects of insulation systems

Radoslaw Szewczyk\textsuperscript{1}, Roger Wicks\textsuperscript{2}, Russell Martin\textsuperscript{3}

\textsuperscript{1}DuPont, Poland. \textsuperscript{2}DuPont, USA. \textsuperscript{3}M&I Materials, United Kingdom

Standardized and life cycle approaches contribute to environmentally conscious design of digitalized MV switchgear

Thierry Cormenier, François Trichon, Dominique Serve

Schneider Electric - Energy Management, France

A standardized knowledge model for high-voltage equipment catalogue data contributes to simplify the life of end users and manufacturers

Serge Blumental\textsuperscript{1}, Thierry Cormenier\textsuperscript{2}, Anne-Françoise Cutting-Decelle\textsuperscript{3}, Aurélie Dehouck\textsuperscript{4}, Laurent Guise\textsuperscript{5}, Jean-Luc Rayon\textsuperscript{6}, Philippe Tailhades\textsuperscript{7}

\textsuperscript{1}RTE, France. \textsuperscript{2}Schneider Electric - Energy Management, France. \textsuperscript{3}Université de Genève, Switzerland. \textsuperscript{4}EDF, France. \textsuperscript{5}Schneider Electric, France. \textsuperscript{6}GE Renewable Energy, France. \textsuperscript{7}GIMELEC, France
268
Evaluation of sustainable SF₆ alternative gas mixtures used in electric power equipment

John Owens¹, Rudi Van San², Jason Bonk¹, Michael DeLorme¹, Ang Xiao¹
¹3M Company, USA. ²3M Company, Belgium

315
The experience of heavy water contaminated power transformer field repairing using combination method of hot oil circulating and hot oil spraying

Ramli Hardiman Situmeang, Muhammad Helmi Prakoso, Alberikus Sano
PT PLN (Persero), Indonesia

320
Data-driven transient temperature rise prediction model for medium-voltage switchgear

Lusha Zeng, Xiushan Ge, Wei Zheng
ABB, China

323
Predicting valve regulated lead-acid battery sensitivity to ageing processes

Nathalie Barne², Michel Cordonnier²
¹EDF, France. ²Enedis, France

325
Enedis requirements for Secondary substations monitoring and control

Franck Serafini¹, Fabienne Montel-Ragu¹, Keddy Kamga¹, Cédric Cholin², Mikaël Chochois²
¹EDF, France. ²Enedis, France
338
Fault diagnosis of transformer focusing on circulating current

Kohei Yuki, Tadashi Koshizuka, Kunihiko Hidaka, Takashi Nakajima
Tokyo Denki University, Japan

344
Predictive maintenance of HV and MV circuit breakers

Maria Inês Verdelho¹, Luís Cordeiro², Ana Filipa Ribeiro¹, André Pimenta¹, Hugo Albuquerque³, Miguel Freitas³, Pedro Miguel Fernandes¹
¹EDP Distribuição, Portugal. ²EDP Digital Glocal Unit, Portugal. ³EDP Inovação, Portugal

356
Self-repair, water blocking materials for sub-sea power cables

Amy Pye¹, Gary Stevens¹, Ian German¹, Tom Andrews¹, Alex Neumann², David Hoyle²
¹Kinectrics UK, United Kingdom. ²ORE Catapult, United Kingdom

357
Characterization of damage to HV/MV overhead power lines when exposed to wildfires

Jorge Mendes Santos¹, Cláudia Gaspar¹, Pedro Carreira¹, António Tadeu²³, João Rodrigues²³, Miguel Esteves²
¹EDP Distribuição, Portugal. ²Itecons, Portugal. ³Universidade de Coimbra, Portugal

362
Exploring evolving faults with interactive multi-time-scale visualization of protection relay events from a substation

Christian Backe¹, Petri Hovila²
¹German Research Center for Artificial Intelligence (Deutsches Forschungszentrum für Künstliche Intelligenz, DFKI), Germany. ²ABB, Finland
365
Feasibility of implementing MV/LV Solid state transformers in the Dutch electricity grids – from economic perspective

Sharmistha Bhattacharyya, Maarten Berende
Enexis, Netherlands

381
Life cycle assessment of the 72,5 kV g3 GIS and 66kV/14MVA green transformer for integration of renewable energy from offshore wind turbine

Yannick Kieffel¹, Elodie Laruelle¹, Christophe Perrier¹, Robert Lüscher², Chrystelle Grillot Zemmouri³, Murat Kavuk⁴, Hasan Yildiz⁴, Bertrand Portal¹
¹GE Grid Solutions, France. ²GE Grid Solutions, Switzerland. ³GE Renewable, France. ⁴GE Grid Solutions, Turkey

382
Analytics 4 assets – the advanced asset management project

Miguel Freitas¹, Luis Cordeiro², Anabela Peixoto², Jorge Mendes³, Tomás Abreu¹, Paulo Gomes³, André Neves³, Ana Delfino¹
¹EDP Distribuição, Portugal. ²EDP Digital Global Unit, Portugal. ³EDP LABELEC, Portugal. ⁴Accenture, Portugal

393
Relocatable integrated solution for e-mobility for fast start-up of EV charging station

Terje Tammemae¹, Susanne Koblitz², Luc Picard³, Carlos Nieto¹, Madis Moppel¹
¹ABB, Estonia. ²Ionity GmbH, Germany. ³ABB, Belgium

401
Maintenance-free sealed-for-life underground distribution substation

Carlos Nieto¹, Antti Keskinen², Mika Suomi², Ants Palgi³, Roman Ionikan¹, Bartlomiej Adamczyk³, Wojciech Piasecki³, Jedrzej Banaszczyk³
¹ABB, Estonia. ²Caruna Oy, Finland. ³ABB, Poland
415
A reliability enhancement study of MV aluminum cable connections regarding connection criteria and processes

Sangkeun Moon, Byungsung Lee, Inyeong Choi
Kepco, Korea, Republic of

425
Practical verification of medium voltage switchgear thermal loadability based on the IEC62271 thermal model

Jur Erbrink, Robert Vosse, Matthijs Mosselaar, Theo van Rijn

1Qirion, Netherlands. 2The Hague University of Applied Sciences, Netherlands. 3Liander, Netherlands

427
Practical verification of power transformer thermal loadability based on the IEC60076-7 thermal model for top oil and hot spot temperature

Jur Erbrink, Rory Leich, René van Etten, Roland Torensma, Robin de Jong, Kees Heida

1Qirion, Netherlands. 2Liander, Netherlands. 3The Hague University of Applied Sciences, Netherlands

430
Impact of climate change on network components: Root Cause Analysis of overhead distribution network failures due to heavy snowfall- a Case Study Gilan, Iran, Feb. 2019

Nima Ebrahimi Nooral, Mahyar Gholizadeh, Gholamali Rakhshani Mehr, Arian Salmanpoor, Hasan Saidi, Milad Biazar

1Tavanir, Iran, Islamic Republic of. 2Gilan distribution company, Iran, Islamic Republic of
Assessing real alternatives to MV SF6 gas-insulated switchgear

José Manuel Inchausti, Joseba Arostegui, Sergio Sebastián, Miren De La Cruz, Jesús Izcara, Juan Antonio Sanchez

Ormazabal, Spain

Comparison of on-site partial discharge measurements using VLF-, DAC- and Slope-voltage forms and dissipation factor measurements on service-aged medium voltage cables

Niklas Tichelkamp¹, Thorsten Reske¹, Nikolai Hopfer¹, Markus Zdrallek¹, Jürgen Herzer², Janis Albert³

¹University of Wuppertal, Germany. ²SWK Stadtwerke Kaiserslautern Versorgungs-AG, Germany. ³ENERVIE Vernetzt GmbH, Germany

Image diagnosis using artificial intelligence for pole transformers

Yusuke Kokubo¹, Shoichi Higashiyama¹, Yuko Inaoka¹, Koki Yamaoka¹, Tetsuya Hirayama¹, Yuji Irimoto², Keisuke Sanda², Akira Fuji²

¹Kansai Transmission and Distribution Inc., Japan. ²Toshiba Digital Solutions Corp., Japan

Secondary substation control architecture focusing on OLTC based transformer integration

Jon Aguirre Valparis¹, Markel Sanz Heras², Iñaki Apellaniz Arana¹, Miguel Álvarez Escalona¹

¹ORMAZABAL, Spain. ²IBERDROLA, Spain
458
Harmonic analysis and distribution transformer monitoring
Jean Francois Tissier, Abdellah Ben Rahmoun
ITRON France, France

464
Establishment of utility poles’ lifetime assessment by artificial intelligence with big data analysis
Naoki Haramoto1, Toshiki Oda1, Atsuhiro Koyama2, Shuuichi Amimoto3, Tetsuya Hirayama1, Koki Yamaoka1, Mariko Ono2, Sho Tanaka2
1Kansai Transmission and Distribution Inc., Japan. 2K4 Digital Co., Ltd., Japan

471
First steps towards LV network automation solutions
Iñaki Apellaniz Arana, Roberto Martinez Almazán, Jon Aguirre Valparis, Sergio Sebastián Martín, Javier Cormenzana López, Juan José Carmona Catalán
Ormazabal, Spain

476
The impact of IEC60076-3 on solid-state transformer design
Bram van Dam1, Korneel Wijnands1, Dongsheng Yang1, Vladimir Cuk1, Erik de Jong2, Guus Pemen1
1Eindhoven University of Technology, Netherlands. 2Prodrive Technologies, Netherlands. 3KEMA B.V. – Flex Power Grid Lab, Netherlands
Revenue metering based on low-power passive instrument transformers complying with IEC 61869-10 and IEC 61869-11 standards including legislative view on legal metrology

Václav Prokop\textsuperscript{1}, Jiří Hula\textsuperscript{2}, Petr Jakubík\textsuperscript{3}, Romana Kovalová\textsuperscript{3}, Jiří Válek\textsuperscript{4}

\textsuperscript{1}ABB s.r.o., Czech Republic. \textsuperscript{2}Elcom, a.s., Czech Republic. \textsuperscript{3}Czech Metrology Institute, Czech Republic. \textsuperscript{4}Elexim, a.s., Czech Republic

Secondary substations digitalization now and beyond

Luka Mocnik
Elektro Gorenjska d.d., Slovenia

Medium voltage cable screen connection behaviour

Klaus-Dieter Haim\textsuperscript{1}, Yuyuan Xia\textsuperscript{2}, Volker Brade\textsuperscript{3}, Kai-Uwe Bentkowski\textsuperscript{4}

\textsuperscript{1}University of Applied Sciences Zittau/Görlitz, Germany. \textsuperscript{2}University of Applied Sciences Zittau/Görlitz, Cocos (Keeling) Islands. \textsuperscript{3}University of Applied Sciences Zittau/Görlitz, Gibraltar. \textsuperscript{4}Behr Bircher Cellpack BBC Radeberg GmbH, Germany

Online MV PD monitoring system: improvements on the automatic assessment of the insulation systems

Andrea Caprara, Giacomo Ciotti
Techimp - Altanova group Srl, Italy

The challenge of grid pre-deployment validation of new technologies for flexible network operation

Iñaki Orue\textsuperscript{1}, Ian Gilbert\textsuperscript{2}, Fernanado Garnacho\textsuperscript{2}, José Antonio Brege\textsuperscript{3}

\textsuperscript{1}OrmaZabal, Spain. \textsuperscript{2}LCOE-FFII, Spain
512
Enhancement of gas flow simulation of internal arc in medium voltage switchgear
Mainak Sinha Roy¹, Jaroslav Snajdr², Pavel Novák²
¹Schneider Electric, India. ²Schneider Electric, Germany

517
Automated hatch for the underground distribution grid with access control
Tiago Chaves¹, Marcos Martins¹, Renata Callegaro¹, Ricardo Brandão², Silvia de Francisci²
¹CERTI Foundation, Brazil. ²ENEL Distribuição São Paulo, Brazil

525
Usage of digital twin for prediction of circuit breaker parts endurance
Ondrej Frantísek¹, Alessandro Stucch², Markus Schneider¹, Francesco Belloni², Dukkaiappan Subbiah Thevar³, Luciano Chenet²
¹ABB Research Center Ladenburg, Germany. ²ABB, Italy. ³ABB Calor Emag Mittelspannung, Germany

526
Real-time condition monitoring of grounding transformers
Jorge Estima¹, Bernardo Almeida², Emanuel Marques¹, Ricardo Prata², Vitor Miguel², Luis Pires², Marco Ferreira¹
¹Enging Make Solutions, Portugal. ²EDP Distribuição, Portugal

527
Load-break switch with vacuum interrupter (VI) in auxiliary-path
Daniel Pesch, Martin Schaal, Stefan Hohmann, Kristian Ermel
Siemens AG, Germany
Development of a novel virtual sensor for managing overloads using a hyper-sensored distribution transformer

Alvaro Ortiz Gil1, Pablo Cirujano Ballesteros1, Iker Lasa Ojanguren2, Ian Paul Gilbert2, Luis Del Rio Etayo2

1OrmaZabal, Spain. 2OrmaZabal Corporate Technology, Spain

Practical verification of a low-loss 11kV distribution grid fault current limiter – the pmFCL

Andrew Cheer1, Jeremy Hall2

1FaultCurrent Ltd, United Kingdom. 2Wolfson Centre for Magnetics, Cardiff, United Kingdom

From traditional to digital asset management of network components

Guillermo Viguera Cebrian1, Mario Mañana Canteli2, Cristina Méndez Gómez1, Alejandro Blasco Royo3, Jon Aguirre Valparais3, Antonio González4

1CIC, Spain. 2Universidad de Cantabria, Spain. 3OrmaZabal, Spain. 4Viesgo, Spain

Return of experience on partial discharge medium voltage cable diagnostic: Senelec utility case study

Al Mansour KEBE1, Mamadou KEITA2

1Senelec, Senegal. 2Megger, France
547
How to overcome difficulties met in deploying digital twins of electrical assets over their whole life cycle? A data management perspective promoting the state of the art of knowledge management

Laurent Guise¹, Luc Hossenlopp¹, Thierry Cormenier¹, Anne-Françoise Cutting-Decelle², Giovanna Di Marzo Serugendo², Imran Kahn¹

¹Schneider-Electric, France. ²Geneva University, Switzerland

550
Testing solution for field data concentrators – Multi channel integration

Diogo Ribeiro, Marco Silva
EDP Labelec, Portugal

553
Sensitivity analysis of cable trench modelling with concrete pipe block and serveral material layers for the ampacity 150kV cables

Martina Bossio¹², Robin Lengwiler²², Britta Heimbach¹, Remo Kälin¹, Raffael La Fauci¹
¹ewz, Switzerland. ²zhaw, Switzerland

567
Advantages of integral remote access management in smart secondary substations in terms of costs, reliability and personnel (e.g. COVID-19)

Frank Thasler¹, Paul Schmitz², Diego Valverde Nieto¹, Jon Aguirre Valparis¹, Juan Antonio Sanchez Ruiz¹

¹OrmaZabal, Spain. ²OrmaZabal, Germany

587
Using artificial intelligence to prevent distribution networks’ accidents

Andrey Kucheriavenkov, Ekaterina Kartasheva
ANTRAKS R&D&M Co, Russian Federation
588
A comprehensive approach to the predictive maintenance of secondary distribution substations: devices and methods
Joana R. C. Faria¹, Marcos Cordeiro², José E. G. Oliveira², Francisco J. A. Cardoso¹
¹LIBPhys - University of Coimbra, Portugal. ²Eneida.IO, Portugal

592
Power feeding equipment for the condition monitoring of insulators for overhead VHV power lines
Joana R. C. Faria¹, Marcos Cordeiro², José E. G. Oliveira², Francisco J. A. Cardoso¹
¹LIBPhys-University of Coimbra, Portugal. ²Eneida.IO, Portugal

593
HV cable networks: Forecasting time to fault from partial discharge measurements
Mike Lees
EA Technology Ltd, United Kingdom

597
Ingenious abrasive-strength tests ensure EDP Distribuição low voltage overhead line insulated cables resilience
Cláudia Gaspar¹, Pedro Carreira¹, Jorge Santos¹, Carlos Varandas², Margarida Alves², Dinis Pinto³
¹EDP Distribuição, Portugal. ²EDP Labelec, Portugal. ³Solidal, Portugal

603
Temperature rise simulation model of RMU with switch-fuse combinations for future load profiles
Imen Ouerdani⁴, Yvan Tits¹, Marc Arens¹, Robby Desmedt¹, Wim De Maesschalck², Stijn Cartuyvels², Pierre Thiry³, Marcel van den Berg⁴
¹Laborelec, Belgium. ²Fluvius, Belgium. ³Ores, Belgium. ⁴Sibelga, Belgium
614
An ENEL-ABB collaboration to develop eco-efficient puffer-type load break switches for medium voltage applications: pilot project
Elham Attar1, Martin Kristoffersen1, Magne Saxegaard1, Massimo Bartolucci2, Bruno Toscano2, Maurizio Mazzotti2, Rainer Kurz3, John Owen4
ABB, Norway.2ENEL, Italy.3M, Germany.4M, USA

617
NEXTSTEP – Developing future smart secondary substations
Pedro Carreira1, Jorge Santos1, Luís Pires1, Clara Gouveia2, Eric Zanghi2, Jorge Pereira2,3, Vasco Ferreira4, Nuno Costa4, José Oliveira5, Nuno Simões5, Paulo Coimbra7, António Tadeu6
EDP Distribuição, Portugal.2INESC TEC, Portugal.3FEUP, Portugal.4EFACEC, Portugal.5ENEIDA.IO, Portugal.6Itecons, Portugal.7ISR-UC, Portugal

622
Challenges with an active distribution network for a Swedish DSO: preparation for technical specification of active secondary substations
Yiming Wu1, Florin Stelea2, Christine Korsell3, Anders Johnsson3
1Vattenfall Services Nordic, Sweden.2SWECO Energy, Sweden.3Vattenfall Eldistribution, Sweden

642
Outdoor, 3D wound core VPI transformer
Kacey Lee1, Kaixuan Xu2
1DuPont, Korea, Republic of.2Haihong Electric, China

646
Modular transmission-class solid dielectric vacuum autorecloser
Blair Kerr, Stefan Micic, Nenad Uzelac, Harold Hirz
G&W Electric, USA
Switchgear sensorization for flexible and efficient asset management
Ian Gilbert, Aritz Hurtado, Patrick Mulroy
Ormazabal, Spain

Analysis of dissipation factor tan δ of natural ester with temperature normalization
Pethai Nimsanong
Power System Operation and Control Section 1, Power System Control Department, Metropolitan Electricity Authority, Bangkok, Thailand, Thailand

Circuit and operation strategy of hybrid high-speed circuit breaker for medium voltage direct current (MVDC) distribution
Youngpyo Cho, Juyong Kim, Jintae Cho, Hongjoo Kim, Seokwoong Kim
KEPCO Research Institute, Korea, Republic of

Guided hole excavating device for ground rod construction of power cable and the method for electric ground safety
Young-Bae Kim, Chul-Soo Seo, Jeong-Seak Jang, Cheol-Hyeon Kim, Chang-Kyu Hong
Busan-Ulsan District Division, KEPCO, Korea, Republic of

Different approaches to LCA for calculating the environmental performance of network components
Irmeline de Sadeleer¹, Anne Rønning¹, Kari-Anne Lyng¹, Elham Attar²
¹NORSUS Norwegian Institute for Sustainability Research, Norway. ²ABB, Norway
Automatic analysis of thermograms - challenge in thermal monitoring of switchgears using infrared cameras

Ralf Gitzel¹, Jörg Gebhardt¹, Tomáš Kozeľ²

¹ABB AG, Wallstadter Strasse 59, Ladenburg, Germany. ²ABB s.r.o., Videnska 117, Brno, Czech Republic

Tarnishing of power contacts in MV switchgear - reasons and solutions

Keyur Tandel¹, Edgar Avalos²

¹Schneider Electric, India. ²Schneider Electric, USA

Performance of in-service shunt capacitor switching devices

Dietmar Gentsch¹, Dukkaiappan Subbiah Thevar¹, Martin Stefanka², Andreas Brandt³, Elisabeth Lindell⁴

¹ABB Research and Development, Germany. ²ABB Research and Development, Czech Republic. ³ABB Global Product Manager, Germany. ⁴ABB Research and Development, Sweden

Reason why small amount addition of polyatomic molecule improves current interruption performance is arc cooling caused by turbulent dynamics

Yuki Inada¹, Ryo Kikuchi², Yuichi Hirano², Akiko Kumada², Fumitoshi Demura³, Hiromasa Kai³, Yasunori Tanaka³, Masaya Masaya⁴, Takayasu Fujino⁵

¹Saitama University, Japan. ²The University of Tokyo, Japan. ³Kanazawa University, Japan. ⁴Osaka University, Japan. ⁵University of Tsukuba, Japan
702
Improving power distribution facilities detection in low-light images with deep learning

Jaein Kim, Junbum Park, Sungho Park, Sung-Min Kim, Sangoh Jeong
Korea Electric Power Corporation, Korea, Republic of

706
The ring main unit of the future: green and digital for smart grid

Christophe Preve¹, Stéphane Gaday¹, Daniel Piccoz²
¹Schneider-Electric, France. ²SASU Daniel Piccoz, France

738
Analyzing overhead MV network fault risk with AI

Alain Tholon, Odilon Faivre, Jérémie Mergeault, Hervé Costil, Marina Parienti, Sébastien Folleville
Enedis, France

744
Cable connection bushing type C according to EN 50181 with Rogowski coil current sensor and capacitive voltage sensor according to IEC 61869-10 and IEC 61869-11

Bernd Schüpferling
Siemens AG, Germany

746
Solar cell as trigger element for ultra fast earthing switch (UFES) for low and medium voltage; self-powered

Dietmar Gentsch¹, Werner Ebbinghaus¹, Martin Stefanka²
¹ABB Research & Development, Germany. ²ABB Global BU Manager Research & Development, Czech Republic
Partial discharge alert system at London Underground
Carlo Gemme¹, Kai Hencken², Ian Rosevear², Andrew Pallett³
¹ABB, Italy. ²ABB, Switzerland. ³London Underground Limited, United Kingdom

IEC 61869-10 and IEC 61869-11 passive sensors and their interface with IEDs
Jose Antonio Moreno, José Ramón Santiago, Carlos Gil
ZIV, Spain

Influence of the contact material used in vacuum interrupters on the chopping behavior of switching arcs
Markus Fischer¹, Dietmar Gentsch², Werner Ebbinghaus², Michael Belte³, Stefan Tenbohlen¹
¹University of Stuttgart, Germany. ²ABB Research & Development, Germany

Advanced circuit breaker for capacitive load operations
Andreas Brandt¹, P. B. Steciuk², Andrea Ferruccio³, Andrea Bianco⁴, Marco Riva⁵
¹ABB AG, Germany. ²Northeast Power System Inc., USA. ³ABB spa, Italy. ⁴ABB spa. ⁵ELDS Technology Center Italy, Italy

Smart circuit breaker: A unique and optimized solution for different applications
Carlo Taborelli, Fabio Mannino, Andrea Bianco, Marco Riva
ABB spa - ELDS Technology Center Italy, Italy
Implementation and parameterization of transformers with saturation effects for the simulation of transmissions of temporary overvoltages

Max Murglat¹, Christoph Wirtz¹, Melanie Möller², Alexander Bauer², Simon Krahl¹, Albert Moser³
¹FGH e.V., Germany. ²Starkstrom-Gerätebau GmbH, Germany. ³AEW at RWTH Aachen University, Germany

The SORAL project - management of the MV cable network based on the Health Index of the individual cable line, obtained from diagnostic measurements

Slawomir Noske¹, Krzysztof Kolodziejczyk², Rogier Jongen³
¹ENERGA-OPERATOR SA, Poland. ²Globema Sp. z o.o., Poland. ³Onsite hv solutions ag, Swaziland

Medium voltage circuit breaker for special applications: pilot experience with KEMA Laboratories.

Andrea Bianco¹, Dukkaiappan Subbiah Thevar², Andreas Brandt², Rene Smeets³, Jerome Keet³, Marco Riva¹
¹ABB spa - ELDS Technology Center Italy, Italy. ²ABB AG, Germany. ³KEMA Labs, Netherlands

Experience of underground cable failures in a UK distribution network

Stelios Christou, Raed Ayoob, Andrew Wooldridge, Joe Stubbs, Ben Hickman
RINA Tech UK, United Kingdom
798
Online prognostic system for power transformers for Industry 4.0
Stelios Christou¹, Andreas Stavrou², Paul Lewin³
¹RNA Tech UK, United Kingdom. ²Electricity Authority of Cyprus, Cyprus. ³University of Southampton, United Kingdom

810
Smart secondary substation as the source of the flexibility services
Adam Babś³, Łukasz Kajda¹, Mirosław Matusewicz², Sławomir Noske², Dominik Falkowski²
¹Institute of Power Engineering, Poland. ²ENERGA-Operator SA, Poland

833
Innovative distributed architecture for continuous PD monitoring in MV substations
Venanzio Ferraro³, David Larochelle², Maxime Durand², Sebastien Chabanet³
¹Schneider Electric - Energy Management, France. ²ndb Technologies, Canada

837
Foresight - LV network visibility and fault recognition
David Roberts¹, Rebecca Kelly², Mark Marshall², Mike Lees¹, Chris Lowsley¹
¹EA Technology, United Kingdom. ²Northern Powergrid, United Kingdom

842
A study on diagnosis of partial discharge of underground cables using deep learning diagnostic model
Jihoon Lee, Mijeong Jun, Huisung Yang
KEPCO KDN, Korea, Republic of
843
Online monitoring of power transformers to improve their operating and maintenance model
Mohammed Zouiti
Enedis, France

847
Pressure vessels for voltage levels ≥ 24 kV for SF₆-free medium voltage GIS
Franka Stöhling, Philipp Kostaras
Siemens AG, Germany

849
Retrofit of outdoor medium voltage circuit breaker with eco-friendly gas to replace SF₆
Michail Michelarakis¹, Gabor Gulics², Steve Lane², Emma Bailey², Raul Montano², Abderrahmane Haddad³
¹Advanced High Voltage Engineering Research Centre, Cardiff University, United Kingdom. ²R&D Department, BRUSH - Switchgear, United Kingdom

860
Hardware of aerial distribution networks, for use on the seashore, corrosion resistant, corona discharges and leakage current
Alessandro Pedro Dadam¹, Sandro Ricardo Levandoski¹, Geraldo Roberto de Almeida², Walter Pinheiro², Simone Cristina Nunes Araujo²
¹Celesc Distribuição, Brazil. ²TAG Inovação Tecnológica Ltda, Brazil

865
Thermal management of MV GIS filled with pure air
Jaroslav Snajdr, Raimund Summer
Schneider Electric, Germany
Utilities concerns about alternative to SF6

Alain Jeanmaire, Frédéric Maciela, Luc Paulhiac, Olivier Porteboeuf, Salhou Drame
EDF, France

A carbon free mobile supply solution combining energy storage system and local production, for planned and unplanned outages

Ali El Akoumi¹, Bastien Lacroix², Nicolas Lecomte², Xavier Picco², Stéphane Jamet², Colin Didier²
¹EDF Paris Saclay, France. ²Enedis, France

Smart grid implementation based on SGMM: A case study in Iran

Hossein Delavaripour, Amir Khazaee, Hamidreza Mosaddegh Hesar, Mehran Ghasempour
Mashhad Electric Energy Distribution Co.(MEEDC), Iran, Islamic Republic of
426
Fast decentralised power flow and voltage control system in MV grids

Josef Hrouda, Alfred Bodor, Frantisek Kysnar, Karel Prochazka
EGC-EnerGoConsult CB s.r.o., Czech Republic

441
Bottom-up services and network integrity: The need for operating envelopes

Michael Z. Liu¹, Luis F. Ochoa², Tian Ting³, John Theunissen³
¹The University of Melbourne, Australia. ²The University of Manchester, United Kingdom. ³AusNet Services, Australia

446
Increasing TSO-DSO flexibility provision from thermostatically controlled loads using soft open points

Matthew Deakin¹, Janusz Bialek¹, Sara Walker², Phil Taylor²
¹Newcastle University, United Kingdom. ²University of Bristol, United Kingdom

449
Enhancing the electrical performance of distribution networks via applying modern techniques for energy saving in industrial factories

Enas Mahmoud, Mohamed Mohamed
Cairo, Egypt

465
An efficient charging/discharging strategy for a community of EESs in a smart grid based on a modified water-filling algorithm

HamidReza Mansouri, MohammadMajid Jalali, Hossein Sabouri
Tehran Electrical Power Distribution Co., Iran, Islamic Republic of
Minimize distribution network losses using wind power

Kaushik Das, Anca D. Hansen, Aeishwarya Baviskar

Technical University of Denmark, Denmark

Hardware in the loop for microgrid control validation in IELECTRIX project

Jean Wild, David Pampliega, Mustapha Rahman, Pierre-Jacques Le Quellec, Aastha Prashar

1Schneider Electric, France. 2Schneider Electric, Spain. 3Enedis, France. 4Tata Power Delhi Distribution Limited, India

Centralized observation and control of rooftop photovoltaics

Tiago Simões, Miguel Lourdo, Beatriz Coelho, José Meireles de Sousa, Francisco Machado, Mónica Vaz, José Antunes, Fernando Gravanita

1EDP Distribuição, Portugal. 2CGI Group, Portugal

Grid forming energy storage with microgrid controls provides green hydrogen, enhanced reliability as well as reduced site costs and emissions. ATCO Clean Energy Innovation Hub (A Case Study).

Stephen Sprott, Stanislav Cherevatskiy, Samuel Lee Mohan, Tilo Buehler, John Glassmire

1Hitachi ABB Power Grids, Australia. 2ATCO Gas, Australia. 3Hitachi ABB Power Grids, Switzerland. 4Hitachi ABB Power Grids, USA

Demonstration of reserve market operation and local flexibility in a smart office environment

Suyi Takala, Antti Hyttinen, Oliver Ojala, Juhani Lepistö, Pirjo Heine

1Helen Ltd., Finland. 2Helen Electricity Network Ltd., Finland
519
Set-up of a new coordinated process for ancillary services provision from DSO to the TSO: an innovative approach to the exploitation of flexibilities connected to the distribution grid

Carla Marino¹, Simone Tegas¹, Luigi D’Orazio¹, Gianluca Di Felice¹, Daniele Clerici², Giacomo Viganò², Chiara Michelangeli²

¹E-Distribuzione SpA, Italy. ²RSE SpA, Italy

540
Operation analysis of paralleled transmission cables in DC distribution system with integrated line telecommunication

Te Zhou, Weihan Bao

Sichuan Energy Internet Research Institute, Tsinghua University, China

546
Flexibility prediction in smart grids, making a case for federated learning

Selma Causevic¹, Ron Snijders¹, Geert Pingen¹, Paolo Pileggi¹, Mathilde Theelen¹, Martijn Warnier², Frances Brazier², Koen Kok³

¹TNO, Netherlands. ²Delft University of Technology, Netherlands. ³Eindhoven University of Technology, Netherlands

571
Distributed energy resource benchmark models for impact assessment

Jason Taylor¹, Jouni Peppanen¹, Mark McGranaghan¹, Daniel Fonseca², Josh Snodgrass³, Shengen Chen⁴

¹Electric Power Research Institute, USA. ²Sinapsis Energia, Brazil. ³POWER Engineers Inc, USA. ⁴RLC Engineering LLC, USA
572
Use of multi agents systems in a crisis management context

Jérôme Cantenot, Grégory Michel
EDF, France

574
Improving power quality through the analysis of smart meter data

Carolina Marques, Ana Delfino, Rui Calçada, Miguel Ângelo Almeida, Inês Graça, Maria Nogueira
1EDP Distribuição, Portugal. 2EDP SA, Portugal

578
ADMS toolbox providing advanced solutions to optimize the real-time grid operation

Lucile Lemius, Angelica Afzelius, Ulrika Wahlström, David Steen
1Atos Worldgrid, France. 2RISE, Sweden. 3IMCG, Sweden. 4Chalmers University of Technology, Sweden

584
Application of dynamic simulation methods to the German gas transmission grid

Felicitas Mueller, Steven de Jongh, Xuanhao Mu, Lukas Held, Michael Suriyah, Thomas Leibfried
Karlsruhe Institute of Technology (KIT), Germany

586
Development of a flexibility service mechanism for the determination and exploitation of flexibility in active distribution network through parallelized optimal power flow calculations

Ankit Singh, Andreas Kubis, Sasiphong Leksawat, Saifal Talpur
PSI Software AG, Germany
Decomposition of reactive power provision between voltage levels

Markus Knittel, Stefanie Samaan, Immanuel Hacker, Albert Moser
RWTH Aachen University, Germany

Grid integration of renewable energy power plants according to the Portuguese regulation

Bernardo Capelo, Andreia Leiria
EDP Labelec, Portugal

Optimised reactive power dispatch to increase network’s electric vehicle hosting capacity

Grant McCormick¹, David Mills², Yiango Mavrocostantí³
¹The University of Auckland, New Zealand. ²University of Southampton, United Kingdom. ³Imperial College London, United Kingdom

Techno-economic value of DERMS for flexible interconnection of solar photovoltaics

Jouni Peppanan, Steven Coley, Jeremiah Deboever, Ajit Renjit
Electric Power Research Institute, USA

Optimized operation of local energy community with flexible energy resources providing local and system-wide flexibility services for DSO and TSO needs

Hooman Firoozi, Hosna Khajeh, Hannu Laaksonen
University of Vaasa, Finland
610
Provision and value of flexibility for reducing financial risks caused by prognosis uncertainties

Wolfgang Renz, Juri Backes, Marvin Schlageter
HAW Hamburg, Germany

623
A-posteriori synchronization of power quality data in smart grids

Ekaterina Nyrobotseva, Leoš Kukačka, Jan Kraus
Technical University of Liberec, Czech Republic

625
Flexibility as alternative to reinforcement: a real world scenario in the Dutch distribution grid

Hadis Pourasghar Khomami¹, Rik Fonteijn², Daphne Geelen³
¹ICT Department, Enexis B.V., Netherlands. ²Electrical Energy Systems, Eindhoven University of Technology, Netherlands. ³Asset Management Department, Enexis B.V., Netherlands

640
PV-based battery-less systems to support islanding in existing distribution grids

Candelaria Utrilla, Vincent Debusschere, Nouredine Hadjsaid
Univ. Grenoble Alpes, CNRS, Grenoble INP, G2Elab, F-38000 Grenoble, France

643
Multi-energy resources and system integration in green airports

Yuan Tian¹, Xin Zhang¹, Yukun Hu²
¹Cranfield University, United Kingdom. ²University College London, United Kingdom
647
Increasing the visibility of low-voltage networks through data analytics

Ronald Monterroso, Julio Pérez-Olvera, Adrià Junyent-Ferré
Imperial College London, United Kingdom

651
Extending the IEC Common Information Model with functions for planning and optimization of distributed energy resources

Tom Berry¹, Jay Britton²
¹Schneider Electric, France. ²Britton Consulting LLC, USA

666
Using residential batteries to provide frequency response after a contingency: active droop calculations and time-varying export limits

Dillon Jaglal¹, Michael Z. Liu¹, Andreas T. Procopiou¹, Luis F. Ochoa¹²
¹The University of Melbourne, Australia. ²The University of Manchester, United Kingdom

676
Unsupervised machine learning-based EV load profile generation for efficient distribution system operation

Haesung Lee, Byungsung Lee, Kijun Park
KEPCO Research Institute, Korea, Republic of

678
Rules of curtailment for flexible DER connection: A comparative analysis

Tanguy Hubert, Steven Coley
Electric Power Research Institute (EPRI), USA
682
An advanced offline simulation platform to test in realistic conditions the energy management system software for operating a virtual power plant
Héloïse Dutrieux Baraffe, Antoine Breton, Claire Stefanelli, Ye Wang
EDF R&D, France

687
Unlocking PFR from residential PV systems using time-varying export limits
William Nacmanson¹, Michael Liu¹, Luis Ochoa¹²
¹The University of Melbourne, Australia. ²The University of Manchester, United Kingdom

688
Distribution grid services: Requirements, procurement, and performance assessment
Tanguy Hubert, Nadav Enbar, Aminul Huque
Electric Power Research Institute (EPRI), USA

694
Economic impact of forecast quality on microgrid energy management systems
Peter Pflaum, Alejandro Yousef da Silva
Schneider Electric, France

695
Impact of electric vehicles in three-phase distribution grids
Prashanth Prakash¹, Bruna Tavares¹, Ricardo Prata², Nuno Fidalgo², C.L. Moreira¹, F.J. Soares¹
¹INESC TEC, Portugal. ²EDP - Distribuição, Portugal
696
Optimal demand charge threshold tuning for economic microgrid energy management

Peter Pflaum
Schneider Electric, France

700
Supporting EV infrastructure rollout using interactive network heatmaps
Elaine Meskhi¹, Esther Dudek¹, Paul Barnfather¹, Geoff Murphy², Laurence Chittock³
¹EA Technology, United Kingdom. ²SP Energy Networks, United Kingdom. ³PTV group, United Kingdom

710
Functional scalability and replicability analysis framework for distribution grids
Sergio Potenciano Menci³, Roman Schwalbe¹, Clemens Korner¹, Barbara Herndler³, Johannes Kathan¹, Christoph Gutsch², Thorsten Gross³
¹Austrian Institute of Technology, Austria. ²CyberGrid, Austria. ³Avacon Netz GmbH, Germany

713
The potential for balancing the Swedish power grid with residential home batteries
Nicholas Etherden¹, Amber Ahmed²
¹Vattenfall R&D, Sweden. ²KTH Royal Institute of Technology, Sweden

714
A design to cost approach applied to isolated microgrids
Benoît Jacquet, Sarah Nasr, Ali El Akoum, André Nekrasov
EDF Lab Paris-Saclay, France
721
Assessing the operation of typical Dutch distribution systems with large penetration of low-carbon energy technologies

Gijs Verhoeven\textsuperscript{1}, Pedro P. Vergara\textsuperscript{1}, Koen Kok\textsuperscript{1,2}
